# Innovation Takes Center Stage

This year's Medtrade shines a spotlight on show-stopping new product advances, as well as services designed to boost providers' bottom line.

By David Kopf and Leila McNeill

#### Bonafide launches new Facility Portal

The new Facility Portal from Bonafide allows DME providers to sell directly to healthcare facilities through an online shopping portal, which is linked to the providers back-office billing operations, inventory and delivery systems. Nurses and other healthcare workers can use the Facility Portal to create patient profiles, place rental and sale orders, suggest patient-specific items based on a clinical algorithm, allow for an approval process and schedule delivery, service and pickup.

#### AutoEPAP for Life Support Ventilators now available in the U.S.

The Astral Life Support Ventilator from ResMed. ResMed has upgraded their life support ventilators by including Optional AutoEPAP in iVAPS for patients in the United States. AutoEPAP or automatic expiratory positive airway pressure automatically adjusts a user's expiratory pressure in response to obstruction of the upper airway. Other upgrades to the Astral iVAPS include easily changeable mouthpieces and full face, nasal or pillow masks from a single limb circuit and customizable program names.

#### CAIRE debuts wearable portable oxygen concentrator

An estimated 12 million U.S. adults struggle with Chronic Obstructive Pulmonary Disease.

The new FreeStyle Comfort from CAIRE is a portable oxygen concentrator, designed to conform to the natural curve of the body for comfortable wear. The device weighs 5 lbs, and delivers up to 1050 milliliters of oxygen per second. It can be operated via wall outlet, motor vehicle outlet or by a rechargeable battery (8-cell or 6-cell replaceable packs). Designed also for air travel, the FreeStyle Comfort is also FAA compliant for commercial flights.
