Bleep rolls out mask-less CPAP machine

The DreamPort Sleep Solution is an adhesive CPAP that does not need headgear, resulting in a light and one-size-fits-all fit. The single-use, disposable adhesives are made from 3M hypoallergenic surgical foam tape often used in hospitals. One box of 32 adhesives will last half a month. The DreamPort, which is covered by both insurance and Medicare, can connect to a user's current device with the included 9-inch connecting tube that connects to all CPAP machines.

The Compliance Team enhances patient portal

The Compliance Team's patient satisfaction reporting and benchmarking subscription service, Patient Quality Measurement (PQM) Satisfaction Portal, has added two enhancements to the database: Patient Survey Kiosk and Patient Survey Invite. The Kiosk allows the patient to enter satisfaction survey data at the time of service via an online computer or tablet device at the provider's location. The Invite allows the provider to send a secure and time-sensitive survey email to each of its patients. The PQM database is free of charge as a value-added benefit to all clients.

OxyGo launches Bluetooth enabled portable oxygen concentrator

The new OxyGo FIT Connect portable oxygen concentrator from OxyGo uses Bluetooth technology to help improve patient outcomes. The My OxyGo Provider Dashboard can connect with the My OxyGo App, giving providers the ability to monitor the device in real-time through troubleshooting, concentrator health checks, preventative maintenance checks and device geo-locating. Both providers and users will be able to monitor battery life, column life and oxygen purity. With the new wireless connectivity platform, providers and users can communicate about the POC in real-time.

Universal launches automated compression garment refill outreach

Universal Software Solutions has added a Compression Stockings Refill Program to its HDMS Outreach Services to enhance patient services while increasing revenue for providers. The refill program will identify and contact only those patients who are qualified for their resupply and who are active patients with a current prescription and medical documentation. The program also lets providers control enrollment on a per patient basis.

Philips Sleep & Respiratory unveils over-the-nose CPAP mask

The DreamWisp is the first over-the-nose nasal CPAP mask designed with a top-of-the-head tube to help sleep apnea patients sleep more comfortably. Instead of sitting in front of the face, the tube sits atop the head and connects to an over-the-nose nasal mask, allowing users to move freely throughout the night.

Bonafide Facility Portal helps HMEs tap into a revenue opportunity

The new Facility Portal lets HME providers sell directly to healthcare facilities through an online shopping portal, which is linked to the providers back-office billing operations, inventory and delivery systems. Nurses and other healthcare workers can create patient profiles, place rental and sale orders, suggest patient-specific items based on a clinical algorithm, allow for an approval process and schedule delivery, service and pickup.
