

# KEEPING FACILITIES SAFER

SAFE. CLEAN.

The US government is relying on private industry innovation to manage current and future pandemics

Using the Bac-Track system, facilities can be viewed from one dashboard and trends can be visualized.

While the government continues to make progress in pandemic planning, it still has work to do to ensure all government facilities are planning, as well. Private sector planning must be well coordinated across our interdependent critical infrastructures and between all appropriate public and private entities.

Our Bac-Track software is a positive first step toward understanding current and future pandemics by driving analytics through science.

# 1

## TEST

Our Bac-Track ATP reader is the most advanced ATP System on the market today. It provides sanitation verification for immediate, quantifiable measurements of environment and high-touch surface cleanliness.

# 2

## TREAT

We provide the latest products and solutions designed specifically for facility managers. This includes the EMist EPIX360 electrostatic sprayers - the most effective handheld, cordless electrostatic disinfectant sprayers in the world. More coverage. Less waste. Better results.

# 3

## TRACK

Our proprietary software, Bac-Track, monitors contamination levels in an easy-to-read dashboard dedicated to your facility. It also allows you to monitor by department or equipment category to pinpoint your problem areas. Our software includes infection control reporting to meet new CMS § Reg 483.80 – F880 guidelines and CDC reporting requirements.

# 4

## TRAIN

We offer onsite and online support and training that will assist in your fight against germs. Our software features “Ask Eddy,” a virtual intuitive assistant.

### BAC-TRACK: CONNECTS ALL FACILITIES
